> RE: TEAMMATE,

Regarding to the Project, I do learn a lot of things of the project and improve myself to how to work as teamwork.

Thank you all for your patience and supports.

Contributions:

I work on some front ends, contents, and testing on this project.

Hello Team,

Thanks a lot for this working as team this semester.

It was cool experience.

Here are contributions I made to the team:

- Did a bit of work in back end
- Participated in styling website

```
>Hi Team
>Thanks all!
>In the semester, I had learned a lot things from this project and teamwork.
>My contributions are
>gave some advice to team
>did some work in the UI
>also worked some back end
>came out a search function
>
```

4. Primary Challenges

The following is a list of challenges encountered by each individual in the group. They also include a list of things they would do differently next time.

4.1 Jonathan

Subject: [F14g03list] Challenges

Challenges (or things I would have done differently):
If I were to do this project over I would have pushed my team to engage in more 'hack' sessions (extreme coding sessions) . I found that the majority of coding occurred in spurts and it would have been beneficial to have the group code in smaller groups. While we had collective ownership and each member was expected to know how different aspects worked, I think it would be helpful to enforce a peer programming approach. I would also spend more time bonding outside of coding. I found that our team worked well together, but I think we could have benefited from spending more time together without looming deadline pressures.

4.2 Rushab

Hi Team,
The challenges I faced were quite limited:
* SVN conflicts! (although rare)
* Throwaway code which couldn't be reimplemented.
* Configurations were time consuming (Convention + configuration)
Rushab

> Hi Teammates,

Challenges:
To get started on the front end and content developments.
The general underlying architecture.
Oral Skills for conversation.
To Understand each teammate's idea and request for project
